

: solid advanced for Closets

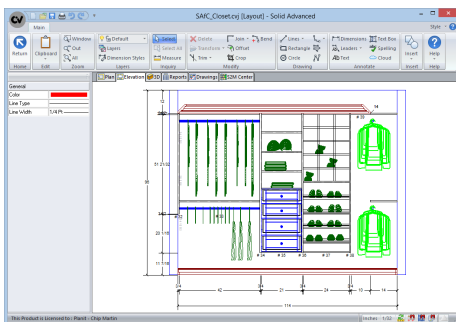

Top Reasons to Upgrade from Solid Standard for Closets

- Advanced CAD Functionality
- Split Screen Views
- Define Material Aliases
- Place Objects on the Backs of Walls
- Import Google™ Sketchup™ Models
- Ability to Add Flutes to Parts
- Plan and Assembly Cross Sections
- Ability to Create Part Libraries
- Custom Scripting Language (User Created Standards)
- Define Your Own Custom Object Intelligence

Solid Advanced for Closets was designed with the mid-sized closet shop in mind; building upon the functionality available in Solid Standard for Closets to grow with your business.

Solid Advanced for Closets is a design and manufacturing software tool that allows you to detail all your Closet jobs. You can automatically generate your shop drawings, 3D renderings, material requirements, part lists and estimating data. Graphically lay out your job to quickly and easily create your shop drawings or use the built in Order Entry function to rapidly produce an estimate.

Easy to navigate ribbonbars make locating items effortless. Component lists and split-screen designing providing floor plan, elevation and perspective views, can be displayed all on one screen. Complete jobs in record time and never worry about errors again by building a 'Favorites' menu from the items used most often.

All Casegood and Closet products include:

- Drawing Capabilities
- 3D Rendering
- Cutlists and Reports
- Pricing and Bidding
